

TWINSIDE

Twinside Precast Concrete Fencing Fencing for the Homeowner

Twinside Precast Concrete Products have been manufacturing and supplying quality fencing systems since the 1980's. We have consistently met or exceeded Australian standards whilst not compromising on our professional service and reliable quality along the way. Our commitment to the use of robust, quality materials, durable finishes, reliability and pleasing aesthetics ensures an excellent solution to the home owner and DIY handyman alike, whatever the location and design requirements.

Twinside fencing systems are designed with quality, strength and durability in mind and are product engineered to exceed Australian standards.

Available in a variety of patterns and including limestone block, brick and timber or plain face, our fencing is also the **only** product on the market which has the facing or pattern on **both sides** of the panels.

With customised colours available to you, Twinside Fencing systems are ideal for home fencing, around garden beds or pleasing aesthetic requirements.

Twinside can cater for all requirements whether it is supply and installation or simply provision of material for the DIY handyman to self install.

Our wall system is uniquely designed in such a way to ensure that installation is simple! Please visit our website to download comprehensive yet easy to follow installation instructions: www.twinside.com.au

Product Specifications

Our fencing panels are 50 mm thick and contain steel reinforcing in accordance with AS 4671. All concrete exceeds 40Mpa. The posts are also reinforced with steel in accordance with this standard. Fences up to 2400mm high with concrete posts, higher walls require steel posts that are always galvanised to stop rusting. All steel reinforcing is hot dip galvanised when installation is within

5 kilometres of the coast, also in accordance with Australian standards.

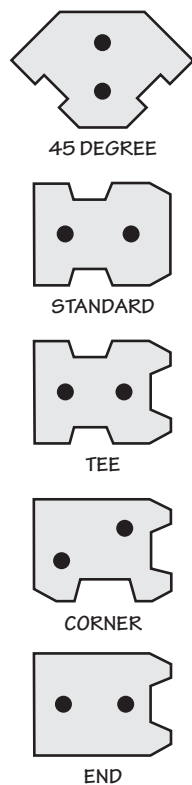

Twinside will coordinate the provision of engineering drawings should planning approval be required, and will liaise with the regulatory bodies to ensure that necessary approvals are obtained with minimum delays.

Twinside Precast Concrete Fencing Fencing for the Homeowner
